

CANCELLATION NOTICE

LF 70, NASA LaRC Hot Work Permit (Fixed Shop Activities) (Oct. 1998)

Cancelled effective 2-15-08.

LF 70, NASA LaRC Hot Work Permit (Fixed Shop Activities) was the tool used to issue a fixed shop permit for ongoing hot work activities (anything using open flame) at a continuing location on Center (permit usually is issued for 1 to 2 years period). Because the function of LF 70 has been incorporated into LF 71, NASA LaRC Hot Work Permit (Rev. Jan. 2008), LF 70 is obsolete and is officially cancelled. Future Hot Work Permits (fixed and/or non-fixed) will be issued using the revised LF 71.
